Career and Technical Education

**Wyandotte**  
 High School

## Career and Technical Education (CTE) in KCKPS

KCKPS provides college and career-ready curriculum to both middle and high school students across our district. Middle school students explore career clusters and focus on choosing a career that matches their interests. Students in our high schools dive deeper into our CTE pathways through elective courses that focus on career skills and workplace readiness.

Our CTE courses provide access to:

- **work experiences**
- **college credits**
- **industry-recognized credentials**
- **entrepreneurial experiences**

### Wyandotte offers 11 CTE Pathways

- |  |                                    |
|--|------------------------------------|
| Biomedical                             | Health Science                     |
| Business Management & Entrepreneurship | Marketing                          |
| Construction & Design                  | Programming & Software Development |
| Corrections & Law Enforcement          | Restaurant & Event Management      |
| Digital Media                          | Web & Digital                      |
